# Contents

Preface . . . . . vii

Structural aspects of light emitting nc-Si prepared by plasma CVD
M. Rückschloss, O. Ambacher and S. Veprek . . . . . 1

A non-destructive study of the microscopic structure of porous Si
H. Münder, M.G. Berger, S. Frohnhoff, M. Thönissen and H. Lüth . . . . . 5

Visible light emission from Si materials
E.F. Steigmeier, H. Auderset, B. Delley and R. Morf . . . . . 9

Study of anodic oxidation of porous silicon: relation between growth and physical properties
A. Grosman, M. Chamarro, V. Morazzani, C. Ortega, S. Rigo, J. Siejka and H.J. von Bardeleben 13

Preparation of porous silicon by spark erosion
D. Rüter and W. Bauhofer . . . . . 19

Investigation of the luminescence properties of Si/βFeSi$_2$/Si heterojunction structures fabricated by ion beam synthesis
T.D. Hunt, K.J. Reeson, R.M. Gwilliam, K.P. Homewood, R.J. Wilson and B.J. Sealy . . . . . 25

Electrically induced selective quenching of porous silicon photoluminescence
A. Bsiesy, F. Muller, I. Mihalcescu, M. Ligeon, F. Gaspard, R. Herino, R. Romestain and J.C. Vial 29

Properties of type II interfaces in semiconductor heterojunctions, application to porous silicon
M. Sacilotti, B. Champagnon, P. Abraham, Y. Monteil and J. Bouix . . . . . 33

Pb-defects and visible photoluminescence in porous silicon
H.J. von Bardeleben, M. Chamarro, A. Grosman, V. Morazzani, C. Ortega, J. Siejka and S. Rigo 39

Partial oxidation of porous silicon by thermal process: study of structure and electronic defects
V. Morazzani, M. Chamarro, A. Grosman, C. Ortega, S. Rigo, J. Siejka and H.J. von Bardeleben 45

Optical investigation of porous silicon membranes
E. Massone, A. Foucaran and J. Camassel . . . . . 51

Ionoluminescence of porous silicon
J. Żuk, R. Kuduk, M. Kulik, J. Liśkiewicz, D. Mączka, P.V. Zhukovski, V.F. Stelmakh, V.P. Bondarenko and A.M. Dorofeev . . . . . 57

In situ photoluminescence and photomodulated infrared study of porous silicon during etching and in ambient
V.M. Dubin, J.-N. Chazalviel and F. Ozanam . . . . . 61

Morphology of porous n-type silicon obtained by photoelectrochemical etching II. Study of the tangled Si in the nanoporous layer
A. Albu-Yaron, S. Bastide, J.L. Maurice and C. Lévy-Clément . . . . . 67

Nanocrystallites in luminescent porous silicon characterized by Raman scattering
I. Gregora, B. Champagnon and A. Halimaoui . . . . . 73

Quenching of porous silicon luminescence at intermediate temperatures
Y.A.R.R. Kessener, G.L.J.A. Rikken and A.H.J. Venhuizen . . . . . 77

Electron bombardment effects on light emitting porous silicon
L. Calliari, M. Anderle, M. Ceschini, L. Pavesi, G. Mariotto and O. Bisi . . . . . 83

Time-resolved photoluminescence spectroscopy of porous silicon
R. Laiho, A. Pavlov and T. Tsuboi . . . . . 89

Effect of substrate roughness on porous silicon light emission
G. Di Francia, P. Menna and M. Falconieri . . . . . 95

Photo- and electro-luminescence from porous Si
H. Kaneko, P.J. French and R.F. Wolffenbuttel . . . . . 101

Comparison of room temperature photoluminescence decays in anodically oxidized crystalline and X-ray-amorphous porous silicon
E. Bustarret, I. Mihalcescu, M. Ligeon, R. Romestain, J.C. Vial and F. Madéore . . . . . 105

Surface passivation: a critical parameter for the visible luminescence of electrooxidised porous silicon
I. Mihalcescu, M. Ligeon, F. Muller, R. Romestain and J.C. Vial . . . . . 111

Optical properties of H terminated Si quantum wires
H.M. Polatoglou . . . . . 117

The role of hydrogen in luminescence of electrochemically oxidized porous Si layer
É.B. Vázsonyi, M. Koós, G. Jalsovszky and I. Pócsik . . . . . 121

Room temperature photoluminescence of photoelectrochemically etched n-type Si
E. Galun, R. Tenne, A. Lagoubi and C. Lévy-Clément . . . . . 125

Photoluminescence of porous silicon
L. Pavesi, M. Ceschini and F. Rossi . . . . . 131

Photoluminescence and optically detected magnetic resonance investigations on porous silicon
B.K. Meyer, D.M. Hofmann, W. Stadler, V. Petrova-Koch, F. Koch, P. Emanuelsson and P. Omling 137

SAXS study of the influence of the porous silicon morphology on the photoluminescence efficiency
Ph. Goudeau, A. Naudon, A. Halimaoui and G. Bomchil . . . . . 141

A fluorescence-line-narrowing study of the broad porous-silicon luminescence band
J. Xing, J.F. Donegan and J. Hegarty . . . . . 147

Temperature dependence of luminescence in porous silicon and related materials
M. Rosenbauer, M. Stutzmann, H.D. Fuchs, S. Finkbeiner and J. Weber . . . . . 153

AC conductivity in porous silicon
M. Ben Chorin, F. Möller and F. Koch . . . . . 159

A model for the electroluminescence of porous n-silicon
F. Kozlowski, P. Steiner and W. Lang . . . . . 163

Porous silicon light-emitting p–n junction
W. Lang, P. Steiner, F. Kozlowski and H. Sandmaier . . . . . 169

Growth of polyaniline films on porous silicon layers
E. Matveeva, V.P. Parkhutik, R. Diaz Calleja and J.M. Martínez-Duart . . . . . 175

Carrier injection and transport in porous silicon Schottky diodes
N.J. Pulsford, G.L.J.A. Rikken, Y.A.R.R. Kessener, E.J. Lous and A.H.J. Venhuizen . . . . . 181

Ultraviolet light from porous silicon by a microscopic discharge
F. Kozlowski, P. Steiner, M. Sauter and W. Lang . . . . . 185

Surface structure imaging, electronically induced modifications, and electroluminescence of porous silicon by scanning tunneling microscopy
M. Enachescu, E. Hartmann, A. Kux and F. Koch . . . . . 191

Magnetic properties of light-emitting porous silicon
R. Laiho, E. Lähderanta, L. Vlasenko, M. Vlasenko and M. Afanasiev . . . . . 197

X-ray investigation of porous silicon under angles of grazing incidence and exit
H. Metzger, H. Franz, M. Binder, J. Peisl and V. Petrova-Koch . . . . . 201

Characterisation of porous silicon layers by spectroscopic ellipsometry
U. Rossow, H. Münder, M. Thönissen and W. Theiß . . . . . 205

Luminescence properties and surface topography of porous silicon
G. Mauckner, T. Walter, T. Baier, K. Thonke, R. Sauer, R. Houbertz, U. Memmert and R.J. Behm 211

Investigation of optical properties of free-standing porous silicon films by absorption and mirage effect
G. Vincent, F. Leblanc, I. Sagnes, P.A. Badoz and A. Halimaoui. . . . . 217

Investigation of different oxidation processes for porous Si by XPS
H. Münder, M.G. Berger, S. Frohnhoff, M. Thönissen, H. Lüth, M. Jeske and J.W. Schultze . . . 223

Radiation effects on porous silicon
B. Pivac, B. Rakvin and L. Pavesi . . . . . 227

Transient photoluminescence decay in porous silicon and siloxene
S. Finkbeiner, J. Weber, M. Rosenbauer and M. Stutzmann . . . . . 231

Experimental and theoretical aspects of radiative processes in porous silicon
G. Fishman, R. Romestain and J.C. Vial . . . . . 235

Excitons in silicon nanostructures
G. Allan, C. Delerue and M. Lannoo . . . . . 239

Nonradiative recombination on dangling bonds in silicon crystallites
M. Lannoo, C. Delerue and G. Allan . . . . . 243

**Invited papers**

Theory of the luminescence of porous silicon
C. Delerue, M. Lannoo and G. Allan . . . . . 249

Spectroscopic identification of the luminescence mechanism of highly porous silicon
P.D.J. Calcott, K.J. Nash, L.T. Canham, M.J. Kane and D. Brumhead . . . . . 257

The luminescence of porous Si: the case for the surface state mechanism
F. Koch, V. Petrova-Koch and T. Muschik . . . . . 271

Photoluminescence and electroluminescence from electrochemically oxidized porous silicon layers
F. Muller, R. Herino, M. Ligeon, F. Gaspard, R. Romestain, J.C. Vial and A. Bsiesy. . . . . 283

Electrical properties of luminescent porous silicon
H. Koyama and N. Koshida. . . . . 293

Defect and structure analysis of $n^+$-, $p^+$- and p-type porous silicon by the electron paramagnetic resonance technique
H.J. von Bardeleben, C. Ortega, A. Grosman, V. Morazzani, J. Siejka and D. Stievenard . . . . . 301

Low-energy scanning cathodoluminescence spectroscopy and microscopy of porous silicon layers
M. Gu, C. Syrykh, A. Halimaoui, Ph. Dumas and F. Salvan . . . . . 315

Luminescence and optical properties of siloxene
M. Stutzmann, M.S. Brandt, M. Rosenbauer, H.D. Fuchs, S. Finkbeiner, J. Weber and P. Deak. 321

Aging phenomena of light emitting porous silicon
T. Ito and A. Hiraki . . . . . 331

Porous silicon electroluminescent devices
W. Lang, P. Steiner and F. Kozlowski . . . . . 341

Author index. . . . . 351

Subject index. . . . . 355

Materials index . . . . . 357
